SUMMARY

IT Help Desk Engineer with hands-on experience delivering **L1/L2 technical support, Active Directory administration, Windows 10/11 troubleshooting, OS imaging, and device deployment** in an enterprise environment. Computer Science graduate with a **3.8 GPA** and hands-on experience designing and deploying **Windows Server, Active Directory, and enterprise networking** environments using **VMware Workstation** and **Cisco Packet Tracer**, with a strong interest in **systems administration, IT infrastructure, and cybersecurity**.

EXPERIENCE

Data Analyst

09/2025 – 12/2025

Aramex Egypt

- **Managed IT asset inventory** using **Microsoft Excel** to track device lifecycles, identify discrepancies, and support **IT infrastructure audits**, improving inventory accuracy.
- **Developed** dashboards and reports that provided stakeholders with visibility into **IT asset inventory**, utilization, and operational performance.
- **Generated** data-driven reports to support **IT asset management**, infrastructure planning, and operational decision-making.
- **Delivered L1/L2 technical support** by troubleshooting **Windows 10/11** workstations, resolving end-user issues, and administering **Active Directory (AD DS)** user accounts, including **account provisioning** and **password resets**.

SKILLS

Technical Support

L1/L2 Technical Support
Desktop Support
Hardware & Software Troubleshooting
OS Imaging & Deployment
Device Deployment
Ticket Management
IT Asset Management
Remote Support

Operating Systems

Windows 10/11
Windows Server
Linux

Virtualization

VMware Workstation
Virtual Machine Deployment
Virtual Network Configuration

Microsoft Technologies

Active Directory Domain Services (AD DS)
Windows Server
Group Policy (GPO)
DNS
DHCP
Remote Desktop Services (RDP)
User & Group Management
Organizational Units (OUs)
Password & Access Management
Windows Administration

Networking

TCP/IP
IPv4 Addressing & Subnetting
DNS & DHCP Troubleshooting
Network Connectivity Troubleshooting
VPN Support
Switching & Routing Fundamentals
Network Diagnostics (Ping, Traceroute)
LAN/WAN Fundamentals

EDUCATION

Bachelor's Degree in Computer Science & Information Technology

10/2022 – 06/2025

Akhbar El Youm Academy

Cairo, Egypt

- 3.8 GPA
- Dean's List, 3rd and 4th year
- Graduation Project recognized as the **Best Project of the Year** and selected to represent the university at the **International Undergraduate Research Conference (IUGRC)**.

PROJECTS

Enterprise Networking & Infrastructure Lab (CCNA)

- Designed and implemented enterprise network topologies using **Cisco Packet Tracer**.
- Configured **IPv4 addressing, subnetting, VLANs, switching, static routing**, and **inter-VLAN communication**.
- Implemented and validated **DHCP** and **DNS** services to support network connectivity and centralized management.
- Verified and troubleshooted network connectivity using **Ping, Traceroute**, and Cisco IOS diagnostic commands.
- Applied structured troubleshooting methodologies to identify and resolve routing, switching, and connectivity issues in simulated enterprise environments.

Enterprise Windows Server & Active Directory Lab (MCSA)

- Designed and deployed a multi-machine enterprise lab using **VMware Workstation** with Windows Server and Windows 10 clients.
- Installed and configured **Active Directory Domain Services (AD DS)** and promoted a Domain Controller.
- Configured **DNS, DHCP**, and **Remote Desktop Services (RDP)** to provide core enterprise infrastructure services.
- Created and managed **Organizational Units (OUs)**, users, security groups, password policies, and administrative permissions.
- Implemented and validated **Group Policy Objects (GPOs)** to enforce security settings, desktop restrictions, and system configurations.
- Joined Windows 10 client machines to the domain, verified authentication, applied Group Policies, and performed administrative troubleshooting.
